Ans2. (I) Educational development: you can use social networking to discuss schoolwork and share assignments.

(ii) Research: You can gather information for projects.

(iii) Independence and self-expression: You can create your own blog to express your thoughts and allow people to express and discuss their views points.

Q3. Share examples of social networking websites.

Ans3. Examples of social networking are :-

1. Facebook
2. Whats app
3. Twitter

Q4. Do you think there are risks involved in using social networking websites? Write three reasons.

Ans4. Yes I think there are risk involved in using social networking websites. This is because.

(1) Anyone can hack it out and get all information about us.

(2) by hacking he can use our ID and can do all illegal works.

(3) even he can got our address, and he can blackmail us for money and etc.

Q5. What do you understand by the term digital footprint? Why do you think it is important?

Ans5. Digital footprints means anything you do in Internet leaves a mark that cannot be erased even if you think it is gone.

On the Internet a digital footprint is any online information about a person. It is the word used to describe the traces or footprints that you leave online. Every time you look to a website you leave footprint.

Because digital footprints give us many useful information so, I think it is important.
